Cohere

Hello,

I'm reaching out about the this role at Cohere. My recent work has centered on .

A few examples of the kind of work I do: Developed and deployed the "Asset Portal," automating workflows to cut job preparation time by 30x; Managed end-to-end delivery of 120+ high-complexity projects, generating $50M+ in revenue.; Led cross-functional teams of 20+ supervisors to execute 24x7 operations in the busiest global region..

If the team is exploring solutions in this area, I'd value a conversation to compare notes and see where I can help.

Best regards,
Mahtab Soin
